

SINGH BANTONY UPENDRA

MERN Stack Developer | React Developer

Surat, Gujarat | 9104153677 | bantony.singh.dev@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Entry-level MERN Stack Developer with a strong focus on React and frontend development, experienced in building responsive web applications using React, JavaScript, Redux Toolkit, React Router, Tailwind CSS, and modern frontend practices. Hands-on experience with Node.js, Express.js, MongoDB, REST APIs, JWT authentication, and third-party integrations through full-stack projects. Strong focus on reusable components, state management, clean UI, API integration, and practical problem solving.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, React.js, Redux Toolkit, React Router, Context API, Tailwind CSS, Vite, React Hook Form

Backend: Node.js, Express.js, MongoDB, Mongoose, JWT, bcrypt

Tools & Integrations: Cloudinary, Multer, Brevo API, Razorpay, Git, GitHub

PROJECTS

RentFlow — Property & Tenant Management System Full-Stack Web Application | [Live Demo](#) | [GitHub](#)

Built a full-stack rental management platform with distinct Admin and Tenant workflows, using role-based access control (RBAC) to separate permissions and protect routes.

Implemented JWT authentication with HTTP-only cookies, including a 7-day cookie expiration for session management.

Designed rent and payment workflows with Razorpay integration, including payment verification, status tracking, and automated receipt generation.

Modeled data across 4 core MongoDB collections (User, Room, Payment History, Receipt History) using Mongoose, with soft delete implemented to preserve historical records instead of hard-deleting data.

Built admin-side tenant management (add tenant, all-tenants list, single tenant detail view) and full room management with CRUD operations, using React and Tailwind CSS.

Applied data encryption for sensitive tenant fields; handled identity document and property image uploads using Multer and Cloudinary with client-side preview and removal flows.

Integrated Brevo API for transactional email notifications and maintained the project on GitHub with 115+ commits across ongoing development.

FashionKart — E-Commerce Frontend Learning Project · Redux Toolkit Focus | [Live Demo](#) | [GitHub](#)

Built the frontend of an e-commerce interface in React to deliberately practice Redux Toolkit for global state management, alongside React Router for multi-page navigation.

Structured reusable components and slices to understand store design, actions, and reducers in a real project context rather than isolated tutorials.

Scoped as a frontend-only learning exercise (backend not self-built) — used to strengthen state-management fundamentals ahead of applying them in production-style projects like RentFlow.

EXPERIENCE

ZARA — Sales Advisor Surat, Gujarat | Nov 2024 – Jan 2026

Assisted customers with product selection and provided guidance based on individual customer requirements in a fast-paced retail environment.

Built strong communication, customer-handling, and problem-solving skills while balancing shift work with self-directed learning in full-stack web development.

EDUCATION

Bachelor of Computer Applications (BCA) 2021 – 2024

Udhana Citizen College, Veer Narmad South Gujarat University | CGPA: 7.43/10

ADDITIONAL INFORMATION

Open to MERN Stack Developer / React Developer internships and full-time opportunities.

Interested in building responsive, user-focused web applications with React at the frontend and strong MERN stack fundamentals.
